Business responsibility requires business to develop a symbiotic relationship with the society in which it operates and create sustainable value. It is also a growing stakeholder expectation. According to the International Organization for Standardization (ISO), this relationship to the society and environment in which they operate is "a critical factor in their ability to continue to operate effectively. It is also increasingly being used as a measure of their overall performance."

In this era of complex and dynamic global economy, all businesses need a sustainability strategy to achieve and maintain competitive advantage. Leading companies from around the world are already pursuing ground breaking initiatives to achieve business and societal sustainability goals. Leaders are leveraging innovation, transparency, accountability and engagement to further the agenda of corporate citizenship and responsible business. It is in this context that Asian Centre for Corporate Governance & Sustainability is presenting the 2<sup>nd</sup> edition of Asia Business Responsibility Summit.
